

BRAINSRING

A Multisensory Literacy Approach

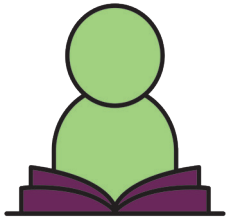

This advanced course focuses on differentiated instruction for students with dyslexia and learning disabilities in grades K-12. Teachers will learn:

- Expanded concepts of decoding, encoding, and morphology
- Multisensory fluency and comprehension techniques including connected text reading
- Informal skill assessments to better determine and track student needs

Level II is available through our livestream online format and is a necessary step in Brainspring's Orton-Gillingham Dyslexia Specialist Certification process. This course is accredited by the IDA and IMSLEC.

Upon completion, participants are eligible to apply for two graduate credits through Ashland University.

Professional Development Benefits

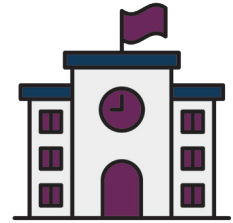

Student

K-12 students receive detailed, customized instruction, designed to specifically meet their needs every step of the way.

Teacher

Educators acquire expertise in delivering, monitoring, and implementing a structured literacy approach to teaching reading.

School

Expertise in an accredited structured language program is critical in preventing and remediating reading failures, and strengthening overall literacy.
